

Little Yellow Duck Key Fob and Bookmark

I used felt for my bookmarks. For the keyfobs, I used felt for the top layer and vinyl underneath. This was because I didn't have yellow vinyl! The odd duck out was made on off-white vinyl and coloured in with Sharpie markers when finished.

The smaller bookmark fits crosswise across the 130x180 hoop so several can be made at once. There wasn't room for the URL on this one so I made a larger size.

Use Kam Snaps to complete the Key Fobs.

To make any of these:

Hoop tear away stabiliser and cover with vinyl or felt. Stitch the first two colours. Add a second layer of fabric beneath the hoop before stitching the last two colours. Matching bobbin thread would be good, but isn't essential.

Remove from hoop and cut out close to the stitching.
